NOTE: The CSA Roadside Resume Scorecard follows the CSA Methodology as published by the FMCSA (Federal Motor Carrier Safety Administration), including DSMS, (Driver Safety Measurement System), BASIC categories, BASIC measures, violation severity weights, time weights, safety event groups, exceptions, and data sufficiency standards. Vigillo is using a best-efforts approach to calculating your CSA Driver Scorecard to provide the most accurate presentation of your projected CSA results. Vigillo monitors new information made available by the FMCSA and incorporates these changes as appropriate.
