

HOW TO MOVE YOUR TND FILES TO THE TND-740

1. The following will “Copy” the “User” folders from a TND to a TND-740.
2. On your Computer Desktop, create a folder called TND Files xxxxxx.
 - a. I would suggest you include the date in the folder name so you will be able to see when the files were copied to the desktop folder.
3. Connect your TND (turned on) to the Computer. This is the TND that has the “User” files you want to copy.
4. Close the Dock if it “pops” up.
5. Open a “File Explore” Window if one does not “Pop” up.
6. Find the “Drive” letter associated with your TND.
7. Open up that “Drive” letter.
8. You should see the following folders.
 - a. Navi.
 - b. NaviMaps.
 - i. On the x10 and x20 models you will not see this folder as it is on the External Micro SD Card.
 - c. NaviVoices.
 - d. RM.
9. Copy the following folders from the TND to the desktop folder “TND Files xxxxxx.” We are going to copy the entire two folders since the two subfolders we need are both called “User.” You can right click on that folder and select Copy, then on the Desktop folder you can right click and select “Paste.”
 - a. Navi.
 - b. RM.
10. Leave this folder up on the Desktop, but minimize it to the left side of your computer monitor.
11. Disconnect the TND.
12. Connect the TND-740 (turned on).
13. Open up a “File Explorer” window on your computer if one does not “Pop” up.

HOW TO MOVE YOUR TND FILES TO THE TND-740

14. Find the “Drive Letter” associated with your TND-740 and click on it.
Under the “Drive” for the TND-740 you may see “Internal Storage”; this is what you need to click on to open up the files/folders.
15. You should see the following Folder.
 - a. .navi
16. Minimize this “File Explorer” window so that it only shows on the right side of your computer screen.
17. Now you should be looking at two “File Explorer” windows.
 - a. On the Left is the folder from your desktop called “TND Files xxxxxx.”
 - b. On the right is the folder showing the TND-740/Internal Storage/.navi.
18. On the left window Double Left Click the “Navi” folder. You should see a “User” folder.
 - a. Double Left Click on the “Navi/User” folder.
 - i. You should see the following files/folders.
 1. Will Copy
 - a. AddressBook (Folder).
 - b. History (Folder).
 - c. Trip.db (File).
 2. Will not copy.
 - a. Cloud (Folder)
 - b. User.ini (File) – will not copy.
 - c. UserGPS.ini (File) – will not copy.
19. On the right window Double Left Click on the “.navi” folder and then Double Left Click on the “User” folder.
20. You should see the same folders/files now on both the Left and Right File Explore Windows.
21. On the Left window, holding the “CTRL” key down, Left click on the following folders/files.
 - a. AddressBook (Folder).
 - b. History (Folder).
 - c. Trip.db (File).

HOW TO MOVE YOUR TND FILES TO THE TND-740

22. This should highlight them.
23. Now “Left” click on the Right folder in an open area in the Navi/User folder.
24. Right Click, then click on Paste.
25. Overwrite all files/folders.
26. On the “Left” File Explore window, in the “address” bar click back on the folder “TND.” You should see the Navi and RM folders again.
27. On the left window Double Left Click on the “RM” folder. You should see a “User” folder.
 - a. Double Left Click the “RM/User” folder.
 - i. You should see the following files/folders.
 1. Will Copy
 - a. AvoidedSegment.db.
 - b. Downloadedtrails.db.
 - c. Fuel.db
 - d. Maintenance.db
 - e. Memo.db
 - f. Mycustompoi.db
 - g. Trails.db
 - h. Truck.db.
 2. Will not copy.
 - a. Sounds (Folder)
 - b. TruckCarlcons (Folder).
28. On the “Right” File Explore window, in the “address” bar click back on the folder “Internal Storage”. You should see the .navi folder again.
29. On the right window Double Left Click on the “.navi” folder.
30. Double Left Click on the “RM” folder and then Double Left Click on the “User” folder.
31. You should see the same folders/files now on both the Left and Right File Explore Windows. The right RM/User folder may not contain all the files as the left RM/User Folder as they may not have been “Default” build yet.

HOW TO MOVE YOUR TND FILES TO THE TND-740

32. On the Left window, holding the “CTRL” key down, Left click on the following files.
 - a. AvoidedSegment.db.
 - b. Downloadedtrails.db.
 - c. Fuel.db
 - d. Maintenance.db
 - e. Memo.db
 - f. Mycustompoi.db
 - g. Trails.db
 - h. Truck.db.
33. This should highlight them.
34. Now “Left” click on the Right folder in an open area in the RM/User folder.
35. Right Click, then Paste, overwrite all files.
36. This should now have moved all your “User” files from the TND to the TND-740.
37. Disconnect the TND-740 and let it Boot up.
38. On the TND-740 open your Chose Destination/Address book and verify your entries.
39. On the TND-740 open your Truck Tools/Timer, Logs and verify your mileage.
